Dear Hiring Manager,

---

I am excited to apply for the Software Engineer Intern position. As a computer science major at UC Davis, I have gained experience working in cross-functional teams through my involvement with CodeLab. As a software developer lead, I have developed strong technical skills and leadership abilities, which I believe make me an ideal candidate for the role.

In my role as a software developer lead, I worked closely with project managers, designers, and other software developers to deliver high-quality software solutions. I was responsible for leading the technical aspects of the coding process, which involved collaborating with other developers to write efficient, scalable, and maintainable code. Through this experience, I developed strong leadership skills and became proficient in agile software development methodologies.

Moreover, I have gained a deep understanding of the software development process through my experience with Code Lab. I understand the importance of collaboration and communication in software development projects, and I am comfortable working in a team-based environment. I am excited about the opportunity to contribute to the success of the company by bringing my technical skills, leadership abilities, and experience working in cross-functional teams to the role of Software Engineer Intern. I am so excited as I am the first generation in my family to enter the software development field.

Thank you for considering my application. I look forward to the opportunity to further discuss how I can contribute as a Software Engineer Intern.

Sincerely,  
**Alexander Hoang**
