SEARCHING FOR: SOFTWARE ENGINEER INTERN

Dear Hiring Manager,

Hello! I am currently an incoming junior at UC Davis majoring in Computer Science. As someone who is passionate about software and developing applications that are impactful towards other people, I am excited to have the opportunity to apply for this position as a software engineer intern.

I currently have a 3.50 GPA and have covered the following coursework; Object-Oriented Programming, Data Structures, Algorithm Design & Analysis, Web Development, Computer Architecture, and many more. I have also gained experience by developing multiple games, creating user interactive websites, and developing android applications. The past few months, I have been interning at UC Davis as a math and robotics intern, utilizing my experience to program and debug activities for the C-STEM program. I have also contributed to FarmLink, a nonprofit organization, as an volunteer to their analytics and media-core team where I analyze data from social media platforms and help create engaging and responsive web pages for their website.

I have attached my resume to this application for your reference. Please do not hesitate to contact me for more clarification on my background. A challenging, yet rewarding internship and the chance to work and learn from professionals is what has drawn me to this opportunity.

Thank you for your time and consideration,

Best,

Alexander Hoang
